Appendix F
Surveillance Logic Model

INPUTS NEEDED	**ACTIVITIES**	**INTERMEDIATE OUTCOMES**

STAFF (including contract and in-kind)
- Epidemiological support
- Data management
- IT Support
- Oral Health Policy Leadership
- Data collection staff

DATA SOURCES
- Existing state data sources
- National data sources
- Community-level data sources

EQUIPMENT
- IT hardware and software

OTHER
- Funding
- Ethical and community support

Develop surveillance plan including flow chart of systems and data collection methods to support oral health program
Establish objectives for surveillance

Select/Develop case definitions/indicators (using standard health indicators whenever possible)

Link existing data sources
Identify data gaps
Collect data to eliminate data gaps, obtain community-level indicators, or meet other pressing data needs

Develop logic data checks and data cleaning protocol
Develop and test analytic approach
Conduct analysis and interpret findings
Develop dissemination approach

Develop written surveillance report
Develop dissemination plans

Ensure data security
Develop sustainability strategies
Evaluate State surveillance system

Ongoing Surveillance of trends in Oral Health indicators

Increase in evidence-based programs, planning and evaluation

Increase in programs targeting populations most in need

DISTAL OUTCOME

Improved oral health

Documentation of changes in oral health indicators (preferably improvements resulting from the program, among target populations)
